

WHO WE HELP

Your phone rings. Your hands are full. The crew picks up.

autoants builds automated assistants for local businesses that run on calls and appointments. Here's what they do in your kind of shop, and what we'll never do.

Get your free preview: autoants.com · lane@autoants.com

Meet the crew

Eight assistants, each with one job. Turn on the ones you need; you approve how they talk to your customers.

The Callback

Miss a call and it texts them back in seconds.

The Responder

Every new inquiry gets an answer right away, from your site or social.

The Scheduler

Requests become booked appointments, confirmed and reminded.

The Reviewer

Every customer gets the same review ask, one tap from your phone.

The Receptionist

An AI that answers when you can't, says it's an AI, and texts you the details.

The Reminder

Brings past customers back, only the ones who said yes to hearing from you.

The Scout

Shows up on Google, Apple, Bing and in AI answers.

The Promoter

Posts, short videos and local ads from your real work.

What they do in your business

The same crew, pointed at the moment your business loses customers.

TREE, HVAC, ROOFING, PLUMBING, LANDSCAPING

Home services & trades

You're up a tree or under a house when the phone rings. The homeowner doesn't leave a voicemail; they call the next crew.

- **The Callback** texts every missed call back in seconds
- **The Responder** answers quote requests while you're on the job
- **The Scheduler** turns requests into booked estimates
- **The Reviewer** asks every customer after every job
- **The Receptionist** picks up after hours, says it's an AI, and texts you the job

MECHANICS, TIRE AND BRAKE, OIL CHANGE

Auto repair & tire shops

Your techs are under a car and the front desk is on the other line. A driver with a check-engine light calls three shops and books the first one that answers.

- **The Callback** texts back the calls nobody could grab
- **The Responder** sends an estimate range from your own price list (the final price after inspection, always)
- **The Scheduler** books drop-off times and sends the confirmation
- **The Reminder** "Your oil change is due" to customers who opted in
- **The Reviewer** asks every customer when they pick up the car

NAILS, HAIR, LASHES, BROWS

Salons, nail spas & barbers

Your hands are busy with a client, the phone rings out, and a new client books somewhere else.

- **The Callback** texts back every call you can't take mid-appointment
- **The Scheduler** books and confirms appointments, with a reminder the day before
- **The Reminder** "Time for a fill?" to clients who said yes
- **The Reviewer** asks every client after the visit
- **The Promoter** before-and-after posts, with your client's OK

Coming soon: comment-to-book. A follower comments BOOK on your post and gets your booking link in a message.

GYMS, CROSSFIT, YOGA, PILATES, MARTIAL ARTS

Gyms & fitness studios

Someone asks about a free trial at 9pm. By morning they've signed up down the street.

- **The Responder** answers trial and class questions in seconds, from your site or social
- **The Scheduler** books the tour or first class
- **The Reminder** invites lapsed members back, only those who agreed to hear from you
- **The Reviewer** asks members after their first month
- **The Callback** texts back the calls the front desk missed

CLEANERS, PET GROOMERS, PHOTOGRAPHERS, TUTORS, REPAIR SHOPS

Something else?

If your business runs on phone calls and appointments, the crew probably fits. Tell us what eats your week and we'll tell you honestly whether automation would pay for itself.

COMING LATER, BUILT HIPAA-READY FIRST

Dental & medical offices

Patient information comes with HIPAA rules: anyone who handles it for you has to sign a business associate agreement and protect it. We're building that before we touch a single patient record. Want to be first in line when it's ready? Tell us.

How it works

1

Reach out

Fill out the form, or call or text. Two minutes: your name, number and business.

2

See your free preview

We build your new website with your real info and reviews, before you pay anything.

3

Pick your crew

A 15-minute call to choose the assistants that fit. You approve every message before it goes out.

4

Go live

Once you say go, your site is live within 7 days or the \$500 setup fee comes back.

WHAT WE NEVER DO

- Fake reviews, or asking only the happy customers
- Texting anyone who didn't say yes
- An AI that pretends to be a person
- Sending anything to your customers without your OK

Your website: free preview, \$500 to go live and keep

The Office Manager: \$750 setup + \$500/mo, founding rate

Other assistants: à la carte
